BOGDAN AKSENOV

FULL-STACK WEB DEVELOPER

PERSONAL PROFILE

I'm a Full-stack Web developer
I have experience in creating from scratch several MVP startups in the financial and technical field of cryptocurrency technologies, backend and frontend parts (API integration with external services)
And recently I have been actively studying Web3 and the development of smart contracts in the Solidity language.

I plan to develop in different directions, projects in the field of Web3 (dApp's) are especially interesting

EXPERIENCE

Full-stack JavaScript Developer
NDA 05.2022— now

- Full frontend development cycle
- Improvement and refinement of the existing API
- Division into microfrontends

Full-stack JavaScript Developer
Evercode Lab 09.2020— 05.2022

- Development and support of internal products in the field of fintech
- Integration with external APIs, creation of aggregators of different platforms
- Development of fully finished MVP products, front-end and back-end part
- Junior Developers Code Review
- Actively participate in corporate events

STUDYING

Solidity Dev. Course
Academy Crypton Studio 02.2022— 04.2022

- Development of major token standards (ERC20, ERC721)
- Full test coverage, working with the hardhat framework
- Creation of bridges between networks, staking contracts, DAO
- Interact with finished protocols and integrate them into decentralized applications
