FRONT END DEVELOPER

A fast-scaling tech company is looking for a Front-end Engineer. The engineer will work on building the web applications and developing the codebase, projects, and legacy systems for a sports platform that deals in high-tech sports production items. The candidate is expected to have a strong software development experience and sound skills in technologies such as C#, JavaScript and frameworks like Angular or React. This is a nice opportunity to collaborate on building highly functional products.

Job Responsibilities:

- Develop, maintain and work with existing legacy systems, codebases and greenfield projects for a sports technology platform
- Analyze and enhance the performance of the applications
- Write robust, clean, scalable and high quality code
- Effectively collaborate with cross-functional teams
- Optimize the platform for faster execution and solve scalability issues

Job Requirements:

- Bachelor's/Master's degree in Computer Science (or equivalent experience)
- 5+ years of software development experience
- Must have an excellent command over JavaScript, C#, Angular or React
- Nice to have some knowledge of Vue.js and CI/CD pipelines
- Must have great interpersonal and communication skills
- Excellent written and verbal English skills
