I am the recruiter, my name is Eugene. Here I am on LinkedIn.
Just in case you need me in detail :)
If not, you can still press "add" and let's be in touch for further joyful cooperation

Here's the company I work for - Prof.UA
-        We are always in touch 24/7 any time of the day. The main priority is to achieve Your business goals as quickly as possible.

-

Aurora is an **Ethereum Virtual Machine** created by the team at the NEAR Protocol, delivering a turn-key solution for developers to operate their apps on an **Ethereum**-compatible, high- throughput, scalable and future-safe platform, with low transaction costs for their users.

aurora.dev

Here you can see the DAO.

Work at Aurora
See our open positions below.

Software Security Lead	Engineering	Remote

(we are also contemplating the job title Software Security Lead) – actively looking, need someone really good

Senior System Administrator	Engineering	Remote

actively looking

Front-end Developer	Product	Remote

looking

UI & Product Designer	Product	Remote

actively looking, need someone really good

It's better to offer ones who have 5+ years experience. If they look savvy and capable but come with a little less experience, we can consider them, too.

As for the question to ask candidates, we would like candidates that have worked more on "application" design, rather than, say, marketing websites. That could be mobile applications or web applications.

The main point is their ability to provide beautiful/user friendly designs and have a good aesthetic taste.

It would be great if they could provide samples of their previous works.

Blockchain/Bridge Engineer	Engineering	Remote

actively looking, ideally need someone with Rust experience, a good blockchain engineer (hard to find :))

Blockchain/EVM Engineer	Engineering	Remote

really looking, if only super exceptional/no brainer candidates with previous EVM (Ethereum Virtual Machine) experience

QA Engineer	Engineering	Remote

looking, it can be a junior role

We are considering candidates of different levels, but with experience in crypto. [Cool dudes](#) are a priority.

What we're working on

At Aurora, we have an ethos of relentless and transparent execution. In that regard, you'll find below the current status of our development activities.

Backlog	In Progress	Done
Bridging of NFTs	Support for London Hard Fork	Support for Berlin Hard Fork
Fast bridge transfers	Aurora SDK for developers	Bridging of ETH
NEAR Interoperability	Block explorer	Bridging of ERC-20 tokens
Sharding	API keys	Migration to Goerli Testnet
	WebSockets RPC	

How can Aurora help you?
Get started today, capturing the first-mover advantage on Aurora! Send me your resume, tell me about your experience and get an invitation to an interview.
