

REVISION EXERCISE 1

19/05/20  
1 Africa lies between  $37^{\circ}\text{N}$  and  $35^{\circ}\text{S}$  and longitude  $17^{\circ}\text{W}$  and  $52^{\circ}\text{E}$ .

2 Name five islands found in the 2nd largest continent in the world.

Comoros

Seychelles

Mauritius

Cape verde

Sao Tome and Principe

Madagascar

3 Name the major latitudes

Equator marked  $0^{\circ}$

Tropic of cancer marked  $23\frac{1}{2}^{\circ}\text{N}$

Tropic of capricorn marked  $23\frac{1}{2}^{\circ}\text{S}$

Arctic circle marked  $66\frac{1}{2}^{\circ}\text{N}$

Antarctic circle Marked  $66\frac{1}{2}^{\circ}\text{S}$

4 list two main effects on rotation

of the earth on its own axis

- Causes day and night

- Affects time

5 List the four seasons in Africa

Summer

Autum

Winter

spring

6 Explain the following

a Summer solstice - occurs when one of

the Earths poles has its maximum tilt

towards the sun

b Winter solstice - occurs when one of the

Earths poles has its maximum tilt

away from the sun

Equator - when the plane of Earth's equator passes through the center of the earth

7 List five basins and the country whose they are found

Djovf basin -

chad basin -

Sudan basin -

Congo basin -

katohari basin -

8 Name two lakes in africa which were formed through downwarping

Bangweulu

chad

9. by use of a diagram show the major rivers found in Africa.
