Blockchain experience

Freelance

- Make NFT by layers, make some layers sparse and also minted them.
- Create and deploy smart contracts on zkSync Era.
- Create a staking smart contract with role access.
- Made different coins erc20.

Skills

Solidity Main language. Made smart contracts for different networks. Worked with different eip's.

TypeScript Using for tests and deploy smart contracts to different networks.

My projects

Subscription Solidity

<https://github.com/monsterafk/subscription>

Subscription for any project. Has two types of subscription: regular and premium .When creating it, I used foundry to write tests.

Coinflip game Solidity, typeScript

<https://github.com/monsterafk/coinFlip-game>

Tossing a coin. When you win, it returns the amount 3 times the amount wagered. Used chainlink vrf v2

Developer tools

Hardhat, foundry, openzeppelin, ethers.js, web3.js, zksync-web3.js, chainlink, ganache, chai, waffle ,mocha, remix.
