

JOB DESCRIPTION: SENIOR BACKEND ENGINEER (GOLANG) - REMOTE

About Mangtas

We are a dynamic, fast-growing start-up which plans to become the world's first digital platform for B2B outsourcing solutions. We aim to make outsourcing available for all by easily connecting startups and SMEs to a pool of quality and reliable vendor partners for successful collaborations on different project opportunities. Think marketplace, but for agencies instead of individual freelancers. The company is currently present in Singapore and The Philippines.

About The Role

We're on the lookout for an experienced, driven Go developer who is ready to be part of our exciting start-up journey. As a Golang developer, you will be a key member of the development team who develops and enhances Golang based products. You will work closely with the team to provide optimal solutions, as well as, design and develop production code that is of the highest quality. You will work with other developers equally capable of architecting, designing and delivering high standard performance applications and systems within realistic time and budgetary constraints. You will be responsible for helping guide others on your team through the lifecycle of a product.

Position requirements:

- 1 year or more professional experience with Golang
- Experience in the Google Cloud Platform (GCP)
- 5+ years of backend programming experience using modern programming languages
- 8-10 years backend development experience
- Production experience with multiple GCP services:
 - Python or NodeJS
 - GKE (k8s and istio)
 - GCE
 - Pubsub
 - Bigquery
 - Firebase
 - Cloud functions
 - Cloud build
 - Stackdriver
 - Dataflow
- Production Experience in protobuf and gRPC
- Production experience in working with container technology (Kubernetes, docker)
- Production Experience in building a Service Oriented Architecture

- Excellent understanding on protobuf and gRPC concepts, noSql database structure best practices and concepts, modern search engine, microservice architecture, event driven architecture, data reporting, monitoring and logging
- Production Experience in building a Event Driven Architecture
- English (professional proficiency)

Nice to have familiarity or experience with:

- On nosql databases e.g Firestore
- Algolia Server-Side Search (knowledge on algolia sort, keyword and filter syntaxes)
- Interacting with GCP services e.g. GKE (k8s and istio), GCE, Pubsub, GCS, Bigquery, Firebase , Cloud functions, Cloud build, Stackdriver, Dataflow

Job Type: Full-time (SG Time Zone)

Salary: Negotiable

Ready to be a part of the Mangtas team? Hit that **APPLY NOW** button and we will get back to you asap and see if you're the right fit.
